OPEN-SOURCE

FULL STACK DEVELOPER AND CONFERENCE ORGANIZER

PYTHON ITALIA | MAY 2019 - PRESENT

Developing and maintaining of the conference website and micro-services build with Python, Django, GraphQL, React, Next.js, Storybook, Tailwind CSS.

CORE DEVELOPER

STRAWBERRY-GRAPHQL | JANUARY 2022 - PRESENT

A library to create GraphQL APIs with Python, dataclasses and type hints.

- Feature development, bug fixing, user support and docs writing.

ACTIVITY

TALK "AUTOMATE CLEANING CODE IN A FEW EASY STEPS"

HTTPS://BIT.LY/3U4EAX4

In these organizations, I discovered several excellent tools and automations that improve your development experience. I talked about them in my talk at PyCon Italia, Europython and Django London meetup.

PROFILE

I am a passionate full-stack developer with a degree in Computer Science and over 6+ years of experience building websites and products using Python, React, React, Next.js and REST/GraphQL as my favourite tech stack. In my free time, I also love to attend and help organize Python conferences such as PyCon Italy and contribute to open-source projects such as strawberry-graphql.
I also have experience working with Agile, Scrum, CI/CD, AWS, NoSQL, TDD and more.

EXPERIENCE

SOFTWARE ENGINEER

MADE.COM | FEBRUARY 2021 - PRESENT

- Software development and design of the micro-services sitting behind the scenes of MADE.COM responsible for managing warehouses, carriers and shipping to the end customer.
- Working with different python frameworks like Starlette, Flask, Aiohttp, FastAPI, and Django Rest Framework.
- A reference point for GraphQL migration because of my open-source work with the Strawberry-graphql library. I was able to give guidance on how to implement our graphql API better.
- Leading the UI development of internal administration UI interfaces for managing consignments and carriers. My experience with React and Next.js has allowed me to help the team develop these applications.
- Refactor the public Made.com blog. Migrate to React and Next.js and, together with the Design Team, give it a new look.

FULL STACK WEB DEVELOPER

DIGITALIS | DECEMBER 2019 - FEBRUARY 2021

- Developing of a web application that allows the extraction of information from the web, get notified if anything chances on social media such as Twitter/Facebook and more, allowing our internal teams to work more effectively.
- Work on backend micro-services built using Django and DRF by either building new services or improving existing ones.
- Implemented a CI infrastructure using Jenkins to test and deploy our services to AWS on ElasticBeanstalk. ,
- Occasionaly, helped with the React frontend building new features or bug fixing.

WEB DEVELOPER

OT CONSULTING | MAY 2016 - NOVEMBER 2019

At OT Consulting I used to be a consultant for Max Mara, an international fashion company.

- helping them develop and mantain their ERP web applications for inventory management.
- developed support the new Italian`s electronic invoice and more.
